This Agreement shall serve as the Dual Enrollment Articulation Agreement pursuant to Section 1007.271, Florida Statutes. USFSM and SBSC are each a "Party" and collectively the "Parties"

**I. TERM**

**II. DUAL ENROLLMENT PROGRAM**

- A. Dual enrollment is a program in which eligible secondary students are permitted to enroll in post-secondary courses that are creditable toward the high school diploma and an associate or baccalaureate degree. - C. Courses. Dual enrollment courses will be available on the USFSM campus, the USFSM online educational platform and on selected individual high school campuses in Sarasota County. Courses are subject to resource availability including staffing, credentialing and other constraints. Dual enrollment courses taught on a high school campus may not be combined with any non-college credit high school course and only USFSM dual enrollment students may be scheduled into dual enrollment courses taught on the high school campus. Dual enrollment courses will be taught either by USFSM faculty or by SBSC instructors credentialed by USFSM.

Courses eligible for the dual enrollment program must meet the following criteria:

Courses outlined in **Appendix B** require either prerequisite work and/or higher standardized test scores.

- D. **Credits.** All college courses taken pursuant to the dual enrollment program must be three (3) college credits or more. Dual enrollment courses and high school credit earned are designated by the Florida Department of Education’s statewide course numbering system and the State of Florida Articulation Coordinating Committee as published in the *Dual Enrollment Course-High School Subject Equivalency List*. SBSC shall assign high school credit upon successful completion.

Students will be limited to one (1) to three (3) courses within the dual enrollment program per semester. No student may earn more than a total of eighteen (18) total credit hours of general education on a high school campus.

### DUAL ENROLLMENT TRANSFER GUARANTEES

The dual enrollment program is an opportunity to take challenging courses and accelerate education opportunities. With hundreds of dual enrollment courses available, there is great potential to further engage and motivate students to pursue academically rigorous courses that capture their interests. Successful completion of dual enrollment courses allows eligible high school students to simultaneously earn high school core or elective credit and postsecondary credit toward a career certificate, an associate degree, or a baccalaureate degree.

Dual enrollment courses will receive the same weighting for the high school grade point average as Advanced Placement (AP), International Baccalaureate (IB), and Advanced International Certificate of Education (AICE) courses. In addition, dual enrollment courses that meet core state university admission requirements in English/Language Arts, Mathematics, Natural Sciences, Social Sciences, or World Languages shall receive the same weighting as AP, IB, and AICE courses in the calculation of the high school grade point average used for admission decisions.

Students should understand, however, that dual enrollment courses are college-level courses, and the amount of work and rigor of content in dual enrollment courses may be much greater than in high school courses. In addition, dual enrollment course grades become a part of a student's permanent college transcript and are calculated into the student's permanent postsecondary grade point average. Poor performance in dual enrollment courses may affect university admissions and financial aid. It is important to do well in these courses to realize the benefits of dual enrollment.

Course selection is important for the dual enrollment student since different programs at a college require different courses to complete the certificate or degree. By choosing courses wisely, students can reduce the time it takes to complete a program after high school graduation. Some students are even able to complete their college certificate or degree at the same time they graduate from high school. Students who don't know what they want to study in college should consult with an advisor to consider focusing on completing general education requirements in communications, mathematics, social sciences, natural sciences, and humanities. All degree programs require general education coursework and, while there is some variation from institution to institution, there are general education courses that are common among most, if not all, institutions.

Florida dual enrollment college credit will transfer to any Florida public college or university offering the Statewide Course Numbering System course number, and must be treated as though taken at the receiving institution. However, if students do not attend the same college or university where they earned the dual enrollment credit the application of transfer credit to general education, prerequisite, and degree programs may vary at the receiving institution. Private and out-of-state colleges and universities may or may not grant college credit for courses taken through dual enrollment.
